This Space Sanitized With An EPA Registered Disinfectant Effective Against Coronavirus

Sanitized On
4-24-20 AC

Fogging is the accepted method with which cruise ships have been sanitized following a viral outbreak. The fogger creates microscopic droplets of sanitizer that want to cling to all surfaces, killing virus and bacteria. A protective bio-shield is left behind that can remain effective up to 90 days in some conditions. Gorilla Kleen can fog your business and provide a window sticker that allows your customers and employees to know that you are taking extra precautions to insure their health and safety. We also offer ongoing service on a monthly or bi-monthly basis.
